SUMMARY

Passionate AI and Data Science undergraduate with hands-on experience in developing **AI-powered systems** and **real-time applications**. Proficient in **Python, Machine Learning, Deep Learning**, and **Cloud Technologies**, with a proven track record of building scalable solutions and optimizing AI models. Developed an **AI-Powered Vehicle Number Plate Recognition System** with **real-time detection, speed estimation**, and **stolen vehicle alerts**. Achieved **95% model accuracy** in predictive analytics and reduced system downtime by **30%** through model optimization. Skilled in building **end-to-end AI pipelines**, deploying AI models into production, and integrating **AI-based automation** into scalable web applications. Dedicated to driving **innovation** and solving **real-world challenges** through AI and research.

SKILLS

Programming Languages: Python, Java, C++, JavaScript
Web Development: React.js, Node.js, Flask, HTML, CSS
AI & ML: Machine Learning, Deep Learning
Cloud & DevOps: AWS, Docker, Git
Tools & Libraries: OpenCV, TensorFlow, PyTorch, MediaPipe, Tesseract OCR
Methodologies: Agile, CI/CD, Data Preprocessing, Data Analysis, Big Data, IoT
Additional Skills: Cybersecurity, Intellectual Property, Intranet, IRIS, RDBMS, Robotics, Prism

EXPERIENCE

Ceeras IT Services **Mar 2025 – Present**
Software Developer Intern (Remote)

- Designed and implemented **frontend and backend components** for comprehensive software solutions, cutting development time by **20%** through reusable code modules.
- worked together cross-functional teams to ensure seamless system integration, resulting in a 15improvement in deployment efficiency.
- Identified and resolved issues across the **full technology stack**, decreasing system downtime by **30%** and enhancing overall reliability.

Shamgar Software Solutions **Jan 2025 – Present**
Machine Learning Intern (AICTE-Approved)

- Developed and refined **AI models for practical applications**, achieving a **95% accuracy rate** in predicting customer behavior.
- Conducted **data preprocessing**, feature engineering, and exploratory data analysis, improving dataset quality by **25%** and minimizing noise in training data.
- Applied **machine learning algorithms** to boost system efficiency, reducing processing time by **40%** for large datasets.
- cooperated diverse teams to integrate AI models into scalable solutions, increasing system throughput by **20%**.
- Gained practical experience in **model fine-tuning, performance evaluation**, and **documentation**, shortening model deployment time by **15%**.

AICTE Internship on AI: TechSaksham **Dec 2024 – Jan 2025**
Intern (Microsoft & SAP – AICTE Certified)

- Completed a **4-week AI internship** with hands-on project-based learning, delivering a **90% accurate sentiment analysis model** for customer feedback.
- Executed an independent project under the guidance of **industry experts**, achieving a **20% improvement** in model performance through hyperparameter tuning.
- Developed and documented an **AI-based solution** using deep learning and data analysis techniques, reducing manual effort by **30%** for data processing tasks.
- Earned certifications from **Microsoft, SAP, and AICTE**, demonstrating expertise in AI and machine learning.

EDUCATION

KL University, Vijayawada <i>B.Tech in Artificial Intelligence & Data Science (CGPA: 9.9/10)</i>	2023 – Present
Sai Siddartha (MPC) <i>Marks: 983/1000</i>	2023
Target English Medium School <i>SSC Marks: 576/600</i>	2021

PROJECTS

AI-Powered Vehicle Number Plate Recognition System – Creating a real-time vehicle detection and number plate recognition system using YOLOv5 and Tesseract OCR. – Incorporating stolen vehicle detection, speed estimation, and WhatsApp alerts . – Developing a web-based dashboard using React.js and Flask for seamless user interaction. – Integrating MySQL for backend data storage. – Enhancing functionality with multi-lane traffic analysis and facial recognition . CERTs Token Ecosystem (Blockchain Hackathon Project) <i>Blockchain Developer</i> * Developed a extbfblockchain-powered learning ecosystem featuring a tokenized content marketplace and credential verification . * Integrated extbflearner incentives, decentralized governance, and real-time notifications for a seamless user experience. * Built and deployed extbfsmart contracts using Solidity on the Ethereum test network , ensuring secure and transparent transactions . Pose Detection Web Application – Developed a real-time pose estimation web app using OpenCV and MediaPipe . – Integrated Flask for backend processing and React for frontend visualization . – Deployed the application on Render for scalability. – App Link Rhyno EV Website Development – Built a responsive and user-friendly website for an EV startup using React.js and Node.js . – Implemented authentication, data visualization, and REST API integration .	<i>Ongoing</i>
---	----------------

CERTIFICATIONS

Python (Basic) Certificate – HackerRank
Python 3 Certification – CodinGame
ESG & Project Management Job Simulation – Forage
AICTE Internship on AI – Microsoft & SAP Certified
JPMorgan Chase Co. Virtual Job Simulation

ACHIEVEMENTS & LEADERSHIP

Organized **20+ research events**, boosting participation by **30%**.
Executive Committee Member at **KLRC Official**, managing technical workshops and hackathons.
Selected for **AICTE TechSaksham Internship Program**.
Active participant in **AI and Blockchain Hackathons**.
